Design and make exceptional furniture for an exciting career.

Design and make outstanding furniture

In Sheridan's Furniture Studio, design and making are interconnected. You'll gain real-world, hands-on experience designing and fabricating furniture that incorporates an understanding of structure, function and aesthetics to create beautiful and functional pieces. From the moment you begin, you'll explore your creativity, develop and produce your ideas and test the limits of innovation.

Connecting furniture with society

Our students learn not only how to design and make furniture, but also how it fits into society. You'll have the opportunity to work with real clients and build a solid portfolio to launch your career. You'll also have a chance to make a difference in marginalized communities – in design collaborations with users, you'll create furniture that meets their needs and builds your profession.

Get a foundation in all Craft and Design studios

This program provides a collaborative, multidisciplinary approach to craft and design. You'll build professional fluency in your major studio of specialization while broadening your skills, experiences and perspectives in the other four Craft and Design studios. You'll work with students and faculty from across all specializations on projects that explore the potential of contemporary art, craft and design.
