

Student Acknowledgment for Informed Consent of Intellectual Property (Electronic via My Student Centre)

Please note: Students will be asked to consent to this Student Acknowledgment electronically via My Student Centre if they are enrolled in capstones or other curricular-based scholarship, research, and/or creative activities involving a company or external organization (unfunded).

I acknowledge that I have read Sheridan's Intellectual Property Policy and Procedure. I understand that Sheridan's Intellectual Property Policy states that the default position is that students own their own work. I understand that any intellectual property created by me, in the normal course of my undergraduate curriculum, belongs to me, unless a Capstone Project or Curricular-Based Research agreement I have signed directly with an external party says otherwise.

I have discussed with my Faculty supervisor and understand that I am responsible for understanding the ownership of any intellectual property in a Capstone Project or Curricular-Based Research. By signing this acknowledgment, I understand that Sheridan's Intellectual Property Policy and Procedure may not apply, depending on the scenario.

I agree to discuss my role for the Capstone Project or Curricular-Based Research with my Faculty supervisor and to clarify any questions I may have with regards to confidential information or ownership of intellectual property resulting from the project on an ongoing basis.

I acknowledge that the faculty supervisor and/or Sheridan have not provided me with any legal advice. Despite that I may have been introduced to the industry partner/external party by an employee/faculty member of Sheridan and discussed my role, I understand that Sheridan is not a party to an intellectual property agreement that I have signed directly with the industry partner/external party. I am negotiating directly with the industry partner/external party.
